Jack P. Broadbent
EXECUTIVE OFFICER/APCO

Dear Ms. Jordan:

This is to advise you that the Bay Area Air Quality Management District is proposing a minor revision to the Major Facility Review Permit for the Kirby Canyon Landfill, Site Number A1812. The purpose of this revision is to update the Title V permit to reflect recent District permitting activity and proposed permitting activity. The additions of equipment to the permit will increase emissions at the facility as follows:

Nitrogen Oxides	26.80 tons per year
Precursor Organic Compounds	6.65 tons per year
Carbon Monoxide	92.66 tons per year
Sulfur Dioxide	11.58 tons per year
PM10	3.60 tons per year

Emissions offsets have been provided as required by BAAQMD Regulation 2-2-302.

At this time, the District also grants Waste Management's petition of February 13, 2003 to designate Joe Morse as the responsible official for Kirby Canyon. Waste Management is the parent company for Kirby Canyon.

The District has made a preliminary decision to issue the Minor Revision to the Major Facility Review permit, but the final decision on the permit issuance will consider EPA comments on this preliminary decision.

A copy of the proposed revisions to the Major Facility Review Permit and the Permit Evaluation and Statement of Basis are enclosed for your review and comment. If you have any questions on this matter, please call **Steve Hill, Air Quality Engineering Manager, at (415) 749-4673.**

Sincerely,

Jack Broadbent
Executive Officer/Air Pollution Control Officer
